

Manolo BOUCARD-BOCCIARELLI

I am a fourth-year **electronics engineering** student and am looking for a work-study placement starting in **September 2026**.

Contact

address : 21 rue du château
de l'Eraudière
44300 Nantes

Phone : +33 7.69.07.13.83

E-Mail : manolo.boucard-
bocciarelli@etu.univ-nantes.fr

Driving licence

Education

2024-2026 : Electronics and
Digital Technologies Student at
Polytech Nantes

2022-2024 : Integrated
Preparatory Class at Polytech
Nantes

2022 : High School Diploma,
Highest Honors

2018 : First Aid Certificate
(PSC1)

Hobbies & Interests

- Electronics and computer repairs
- 3D modelling
- Homelabbing
- Sport
- Writing and singing
- Audio mixing
- Cooking and baking

Language skills

French Native

English B2 level (TOEIC)

Spanish Basic knowledge

Profile

Energetic, creative, and proactive, I enjoy turning ideas into concrete projects. I like designing technical solutions tailored to a need, a challenging task that I take pleasure in completing.

Skills

Electronics & Design

Analog circuit design, circuit assembly, schematic capture and PCB layout (*KiCad*), simulation (*LTSpice*), component sizing, measurement and troubleshooting.

Embedded Systems & Programming

Microcontroller programming (C), Embedded GUI development (*LVGL/Arduino_GFX*), Real-time control systems.

IT

Experienced with Linux and Windows systems, set up a self-hosted personal server (*Docker*, *SSH*, *network*), backend development for a web server, *MATLAB* simulation.

Team Management

Event planning (*Jira*), sports event organization, task delegation, team coordination, effective communication.

Professional Experience

May – August 2026: Research Assistant – SEPIC Laboratory

- Design of an electronic interface board between a DSP docking station and a power inverter
- Analysis and technical documentation of a sensor data acquisition board (Sensor Board)

September 2025–April 2026: Project Manager – BeeWatch

- Design of an on-board monitoring system for beehives
- Implementation of wireless communication (LoRa)
- Development of a web-based user interface

November–December 2025: Motor control based on the SAMD21

- Configuration and use of the SAMD21 microcontroller's internal peripherals (timers, DAC, ADC, etc.)

June – July 2025: Hi-Fi Product Design – Sound Heritage

- Designed a variable-frequency power supply
- Reverse-engineered and improved a preamplifier
- Established a testing protocol for amplifiers
- Wrote technical documentation

September – December 2024: Autonomous Robot Development

- Integrated distance and light sensors into the embedded system
- Implemented a conditional algorithm on a microcontroller

Volunteer & Extracurricular Activities

September 2025 – April 2026: Secretary, Sports Committee, Polytech Nantes

- Organized sports events
- Coordinated trips
- Managed sports teams

2023 – 2026: Member, Polytech Basketball Team

2014 – 2022: Youth Coach Assistant, Grand Lieu Basketball Club
